Dear Sir/Madam,

Please suggest the following:

1) What is the minimum distance required between High Tension Line and Residential plot.
2) What is the minimum height requirement for laying High tension lines in residential area.

3) Can High Voltage lines be laid on the same poles installed for standard Domestic lines, If yes what are the guidelines.
4) Is it required to install shielded cables for high tension lines (1100v or more) in residential area within 1.5 mtr of residential plots
5) Who is the appellate authority in PVVN to report irregularities carried out by Department/Contractor in laying High Tension lines in residential area.
