Public Disclosure

Public disclosure and participation are the principal steps in POWERGRID’s project planning and implementation. Our corporate policy is aligned to minimize communication gap between the company and its stakeholders, thereby ensuring long-term symbiotic relationship.

Consultations are carried out during construction of transmission lines and substations. In cases of securing land through willing-buyer willing-seller agreements, disclosures and consultations begin much before the negotiation meeting.

Transmission line Construction

Public Consultation for Screening, Assessment and Route/Site finalization

Consultation at individual and community level

Resolution of issues raised during initial screening and walkover surveys

Affected person(s) compensated as per provisions/Issues Resolved

Substation Construction
